

Moving the world through power and strength in tubular products.

About us

With over 140 years of history and experience, Lander is a multiple award-winning supplier of precision engineered tube-based products with a global reach from our manufacturing facilities in the UK and USA.

We specialise in the production of steel, aluminium and plastic tubular assemblies for fluid and air transfer systems and welded structures for the global automotive, off highway, commercial vehicle and industrial markets.

Our wide range of capabilities to process tube sizes from $\varnothing 4\text{mm}$ up to $\varnothing 152\text{mm}$ in a variety of material types and at any volume level, make us a single point of supply for all of our customers' needs.

Market Sectors

Automotive

Lander has been supplying the automotive sector for almost 100 years' and has extensive experience with both OEMs and first tier customers.

Commercial Vehicles

We manufacture products for a wide range of commercial vehicles, from bus and truck to vans and taxis.

Off Highway

We supply products for many off highway applications including construction, agriculture, material handling, marine and rail.

Industrial

As a supplier of precision engineered products, Lander can provide a number of manufactured solutions for industrial power generation markets including diesel, oil, electric and renewable energy.

West Bromwich, UK

Specialising in smaller bore tubes for off highway, industrial and niche automotive markets, West Bromwich is configured for low to medium range volume products.

Malvern, UK

Focused on lower volume products, Malvern has capabilities for CNC bending tubes from $\varnothing 6\text{mm}$ up to $\varnothing 152\text{mm}$ and can fabricate tubes up to 12 inch in diameter, it also houses a paint plant and prototype facility.

Birmingham UK

Our global HQ and engineering centre, with over 10,000 square metres of manufacturing space, our Birmingham plant is configured for medium to high volume products.

Franklin, USA

Our main US tube processing facility serving off highway, industrial and commercial vehicle markets.

Rabun Gap, USA

Our paint facility for US products, there is also significant floor space available for new production cells.

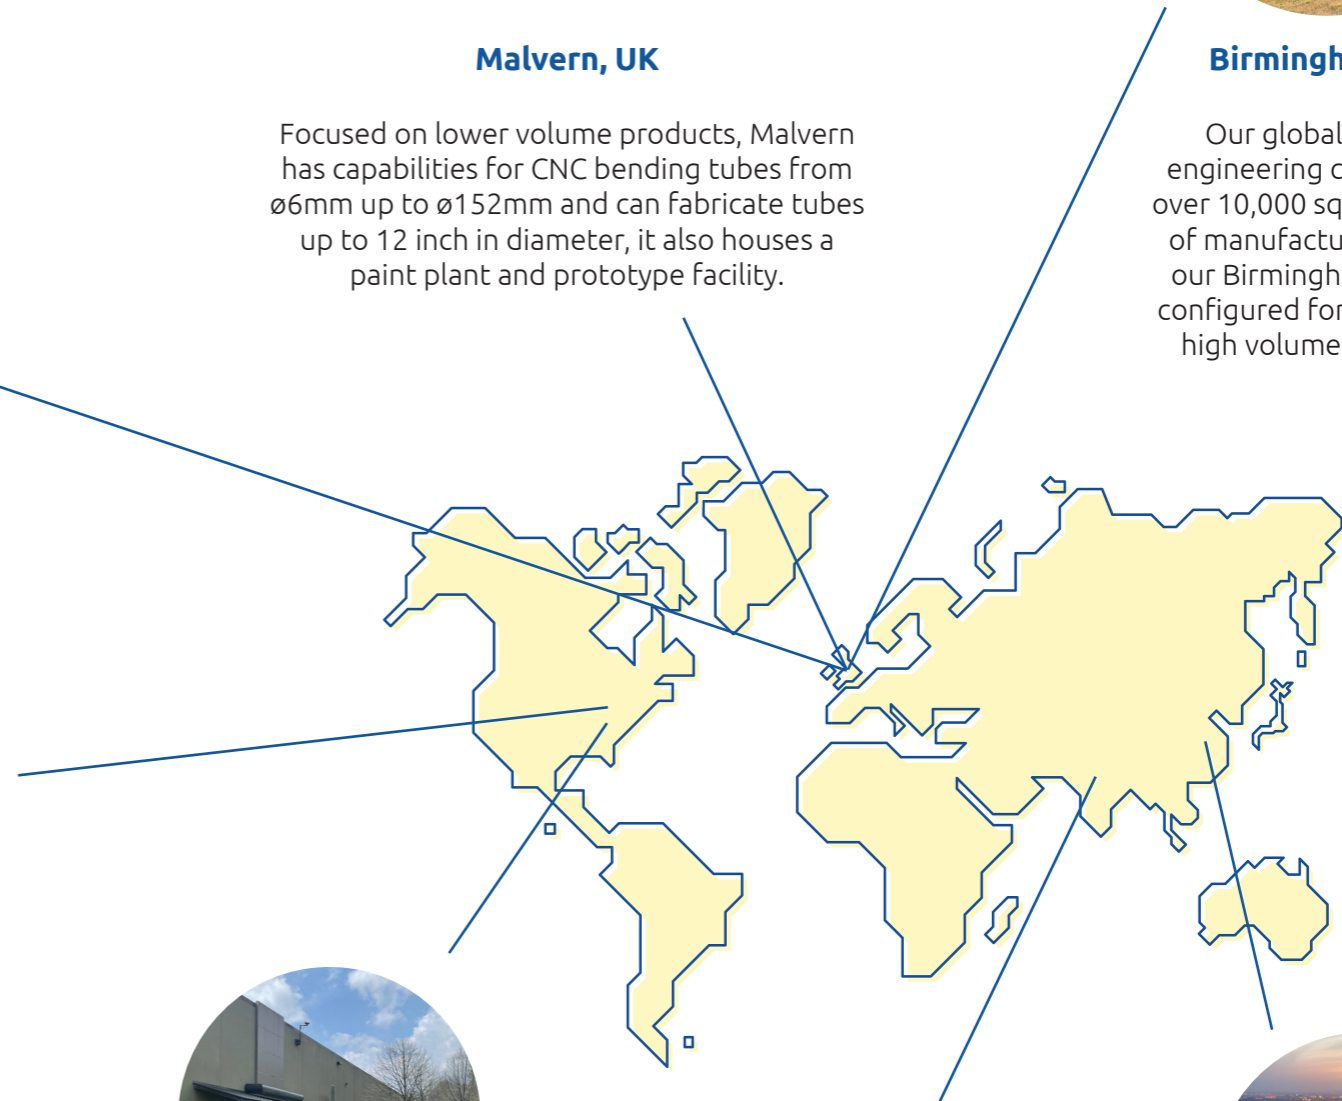

Gurgaon, India

Our Locations

Our Capabilities

Lander is committed to offering high quality products and services, whether for initial prototype samples, volume serial production or aftermarket spares. Thanks to our broad range of capabilities in design, tube forming, metal joining, assembly, and surface treatments we are able to offer the same approach to manufacturing whatever the point in the product life cycle.

Our Services

Tube Bending

CNC tube bending in diameters from $\varnothing 4\text{mm}$ up to $\varnothing 152\text{mm}$. We also fabricate tubes up to 12 inch in diameter.

End form/Beading

We can produce all types of beads including single bead, double bead, quick connector and rolled bead end forms.

Welding / Brazing

Our metal joining capabilities include manual and automated MIG welding, manual TIG, aluminium soldering and brazing, mild steel furnace brazing. Stainless steel brazing is done by an external sub-contracted supply partner.

Validation Testing

Where applicable we leak test and gauge our products to ensure only the highest quality product is shipped to our customers.

Surface Coating

We have in-house powder coat and wet spray lines in both the UK and USA. We also use local supply partners for plating and other painting requirements.

We have inhouse design engineers and a dedicated Programme Management team who manage New Product Introduction in-line with our customer key milestone dates in order to deliver on time every time.

Structural Assemblies

Lander manufactures complex structural fabricated assemblies across different vehicle applications. These include Front and Second row welded seat frames, cross car beams (IP Beams), Support structures, Mounting Frames, ROPS, FOPS and Grab Handles.

Fluid and Air Transfer- Metal

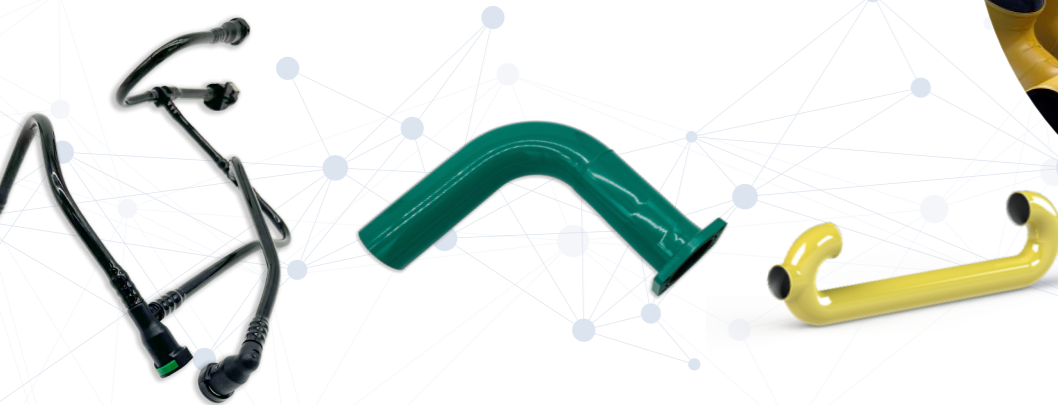

From Turbo Feed and Return pipes, Multi Zone Heating System assemblies, Transmission Oil Cooling pipes to Dipstick Oil Indicator tubes, we are able to process complex tubular assemblies across a wide range of tube diameters from $\varnothing 4\text{mm}$ up to a maximum of $\varnothing 152\text{mm}$.

Fluid And Air Transfer – Plastic

Our single and multi-layered smooth bore or corrugated nylon plastic assemblies can be used across a variety of applications including Cooling, Breather vent pipes, Fuel Lines, Vapor Tubes (EVAP), Oil pipes, Washer Fluid Lines and many more.

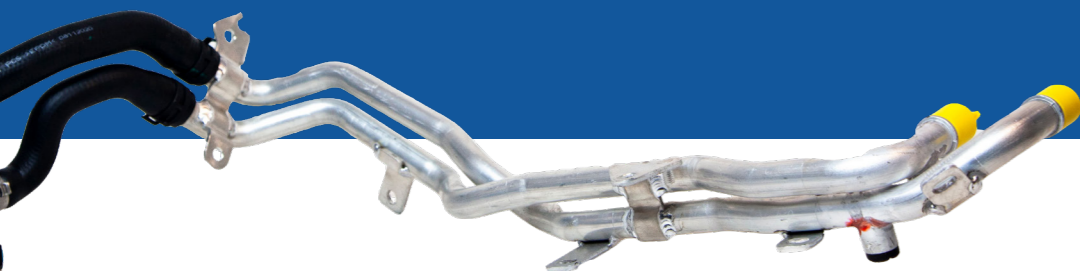

Our Products

Quality

Lander is an organization focused on achieving quality excellence through a zero-defect culture. We are passionate in not only meeting, but exceeding our customers' expectations.

We are committed to building quality into our systems and processes in order to minimise the risk of sub-quality product leaving our facilities.

Corporate Social Responsibility

Lander are committed to working sustainably and help reduce the environmental impact of our activities whilst also having a positive impression within the communities that we operate.

Our Manufacturing Apprenticeship programme was voted 14th in the Top 100 National Apprenticeship Service Awards in 2020 and we have welcomed over 300 young people through the scheme since its launch in 2016.

Support for local charities is also at the heart of our community activities and we hold several fundraising events which are generously supported by our workforce throughout the year.

Certifications

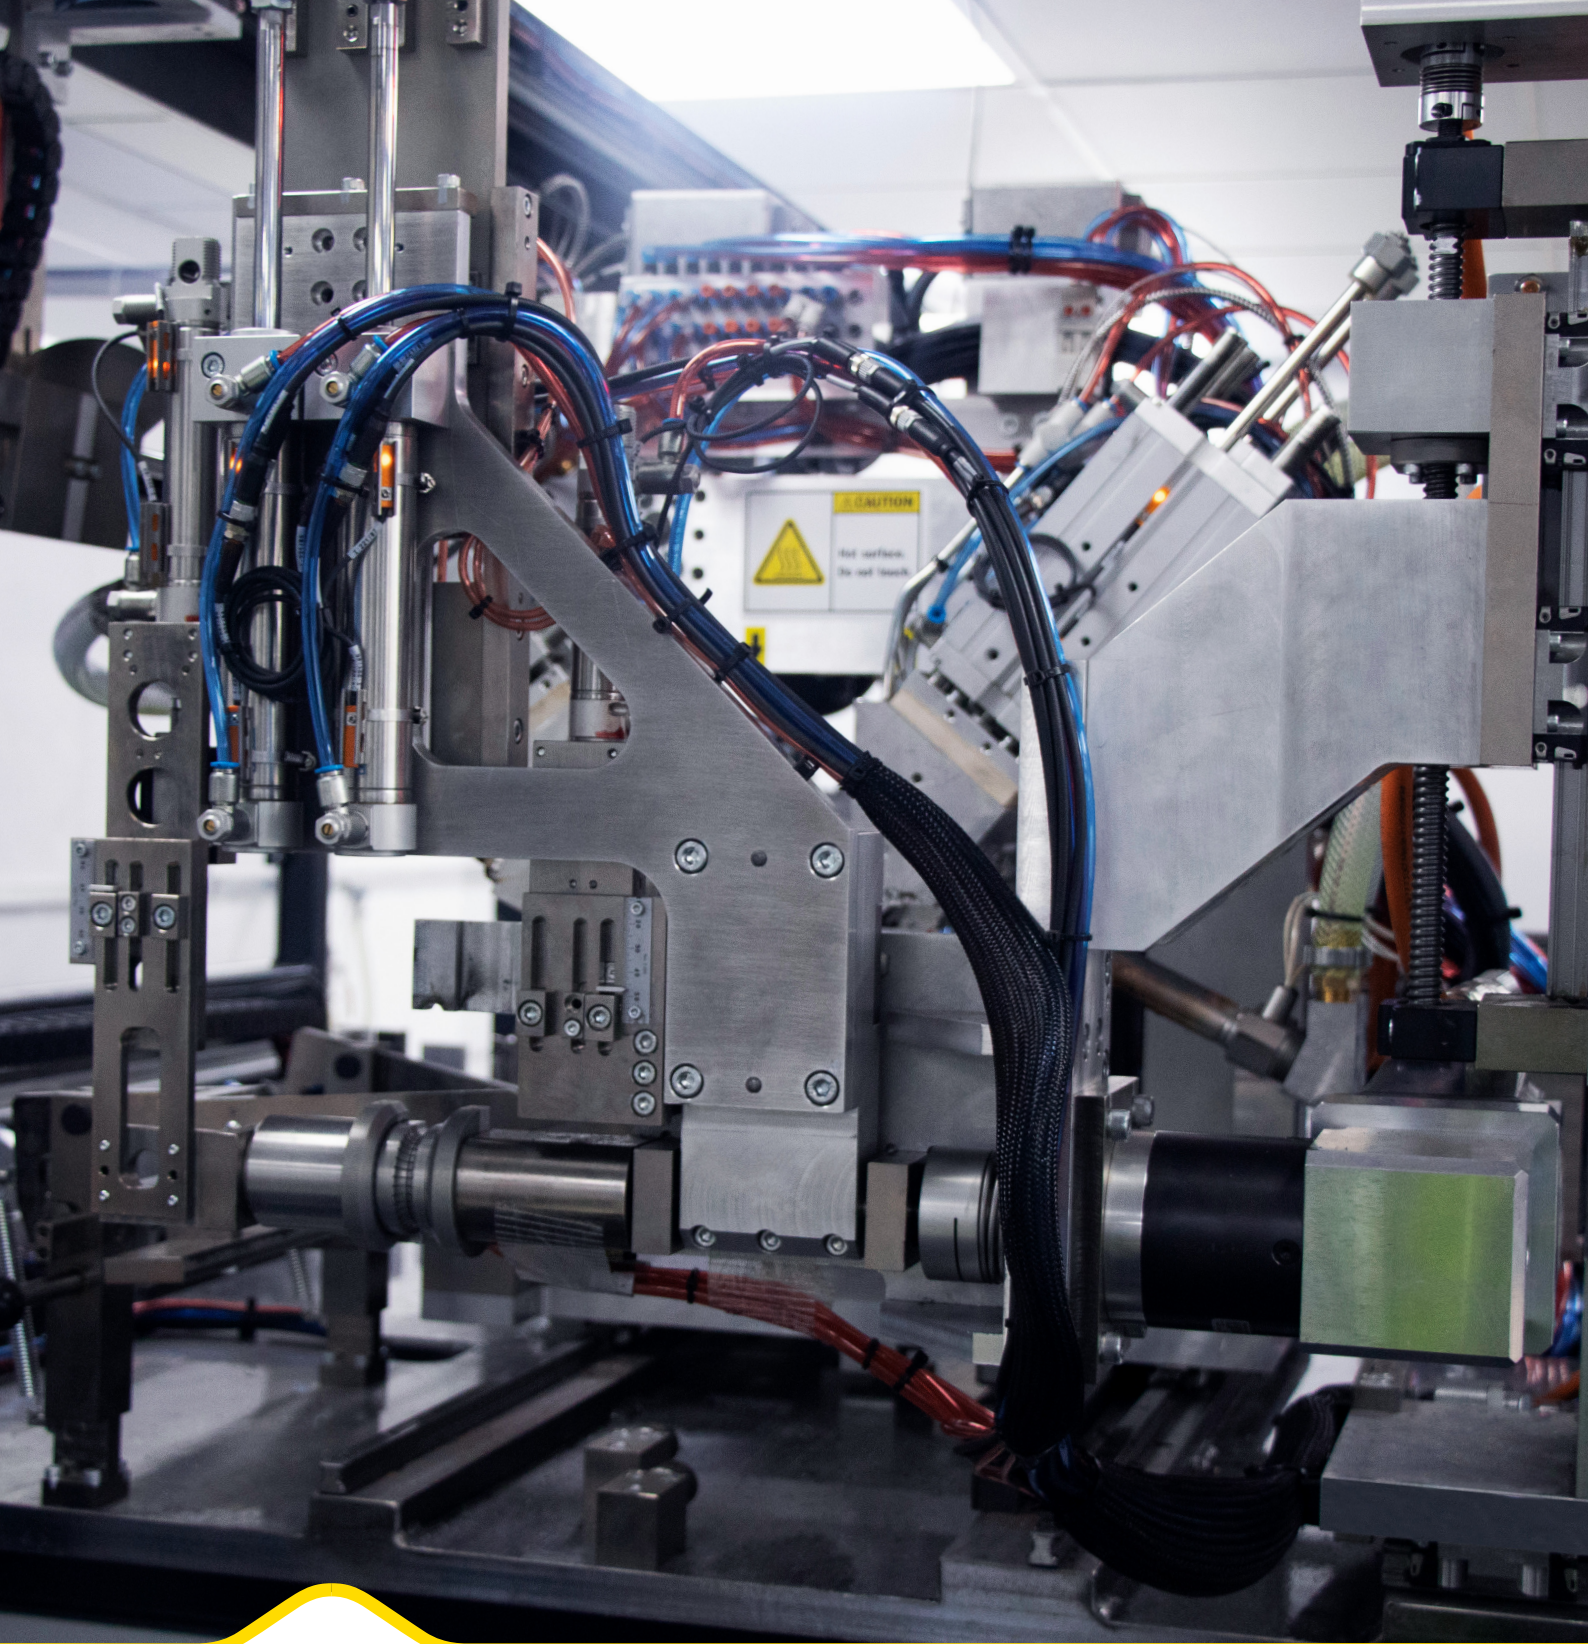

Lander is certified with the main certifications expected for a high-quality manufacturing company. These include IATF 16949, ISO 14001 and ISO 9001.

- Lander have successfully been awarded several accolades over recent years these include:
- 2016** TMMX National Award – Supply Chain Excellence
 - 2017** SEMTA National Award – SME Investment in Skills
 - 2017** Made in the UK National Award – Apprenticeships & Training
 - 2017** National Apprenticeship Service - National Award – SME Newcomer of the Year & Top 100
 - 2018** TMMX National Award – Leadership & Strategy
 - 2018** MAKEUK National Award - Leadership & Strategy
 - 2019** TMMX National Award – People and Skills
 - 2020** National Apprenticeship Service – Top 100 Employer – Rank 14th
 - 2021** TMMX National Award – Supply Chain Excellence
 - 2021** TMMX National Award – Operational Excellence
 - 2021** TMMX National Award – UK Manufacturer of the Year

Awards

We are proud to have been presented with many awards including the above.
